

Medacist has been the leader in drug diversion analytics since its inception. Over the past 20 years, we've supported thousands of hospitals across the country with our RxAuditor analytics suite. As both the healthcare and technology fields evolve, Medacist is transforming alongside them. We're combining our impeccable history of success with state-of-the-art technology to bring our customers our newest innovation. We're proud to present our next generation of world class drug diversion analytics – **Genesis**.

The **Genesis** analytics platform is built on a new engine quantified through a knowledge base comprised of 20 years of industry exclusive ADS and EMR data from thousands of facilities. The intelligence models derived from this exclusive and proprietary knowledge base have been built on diversion experience of pattern recognition and certified outcomes through machine learning algorithms.

This engine will power an entire new suite of products leading with our first offering: **RxAuditor Investigate**

RxAuditor Investigate is a web-based application portal for all members of an enterprise wide drug diversion risk team. It provides the team with a pin-pointed outlier list curated by our proprietary risk assurance scoring methodology as well as with a means to conduct your diversion auditing workflow within the application. Our sophisticated visualizations and easy-to-use web application powered by the **Genesis** engine deliver the healthcare industry the highest level of insight into drug diversion.

RxAuditor Investigate is the first step to the future of drug diversion analytics and we can't wait to share it with you!

- ENTERPRISE LEVEL DIVERSION RISK DASHBOARD
 - UNEQUIVOCALLY TARGETED OUTLIER SCREENING
